

To Whom It May Concern:

I am pleased to introduce the EZ Lift Vest, a practical and efficient manual lift-assist device created by my sister, Cathy, and I. As registered nurses, we designed the vest to help individuals with limited mobility during ambulation, lifting, transfers and repositioning, while also supporting the caregivers, family members, physical therapists, and healthcare professionals.

The EZ Lift Vest was developed to promote safer assistance for patients and loved ones who struggle with mobility and may be at risk for accidental falls. The EZ Lift Vest is a one-piece design, that has the appearance of everyday apparel while providing the strength, durability, and support needed to assist with lifting, moving, or repositioning.

Made from lightweight, breathable poly-cotton twill fabric, the vest fits snugly around the upper body and helps distribute pressure evenly, offering full back support and a comfortable fit. The EZ Lift Vest can be worn throughout the day without interruption, allowing users to remain supported during routine activities.

The EZ Lift Vest features a patented design and has undergone successful clinical trials in adult day care centers, assisted living facilities, and home care settings. It is proudly manufactured in the United States.

Please visit www.ezlifvest.com to view our video and learn more about the EZ Lift Vest.

I would welcome the opportunity to answer any questions, provide additional information, or discuss how the EZ Lift Vest may benefit the individuals and caregivers you serve.

Thank you for your time and consideration. I look forward to hearing from you.

Warm regards,

Peggy Cauthen, RN
